

2012 Success Stories Campaign

In preparation for Health Quality Ontario's (HQO) 2012 Quality Monitor Report on Ontario's Health System, HQO has officially begun soliciting success stories for its 2012 campaign.

Through its Quality Monitor report, HQO highlights the good work in the health system, and promotes quality improvement.

HQO is reaching out to hospitals, long-term care homes and other organizations to capture some of Ontario's most impressive and inspirational health care achievements.

This year's high priority topics include, but are not limited to:

- Reductions in hospital utilization by alternate level of care patients;
- Reductions in hospital readmissions; and
- Improvements in care transitions between health care settings (e.g., discharges from hospital to long-term care (LTC), moving from the community into LTC).

Stories should include the following:

- Situation
- Aim
- Timeframe for improvement
- Measure
- Change ideas (and their respective sub-categories)
- Next steps

To submit your success story to HQO, please fill out the template available for download [here](#), including your organization's results (preferably via Excel spreadsheet).

Send the documents to success.stories@hqontario.ca before February 3rd, 2012.
